

# SISNU

## Systeme d'Information Sanitaire National Unique

### About SISNU Haiti

- Using DHIS2 platform for monthly Health Statistics report
- Integration of several vertical health programs.
- DHIS2 dashboard available at each level for program monitoring.
- Decentralized at the lowest administrative level .

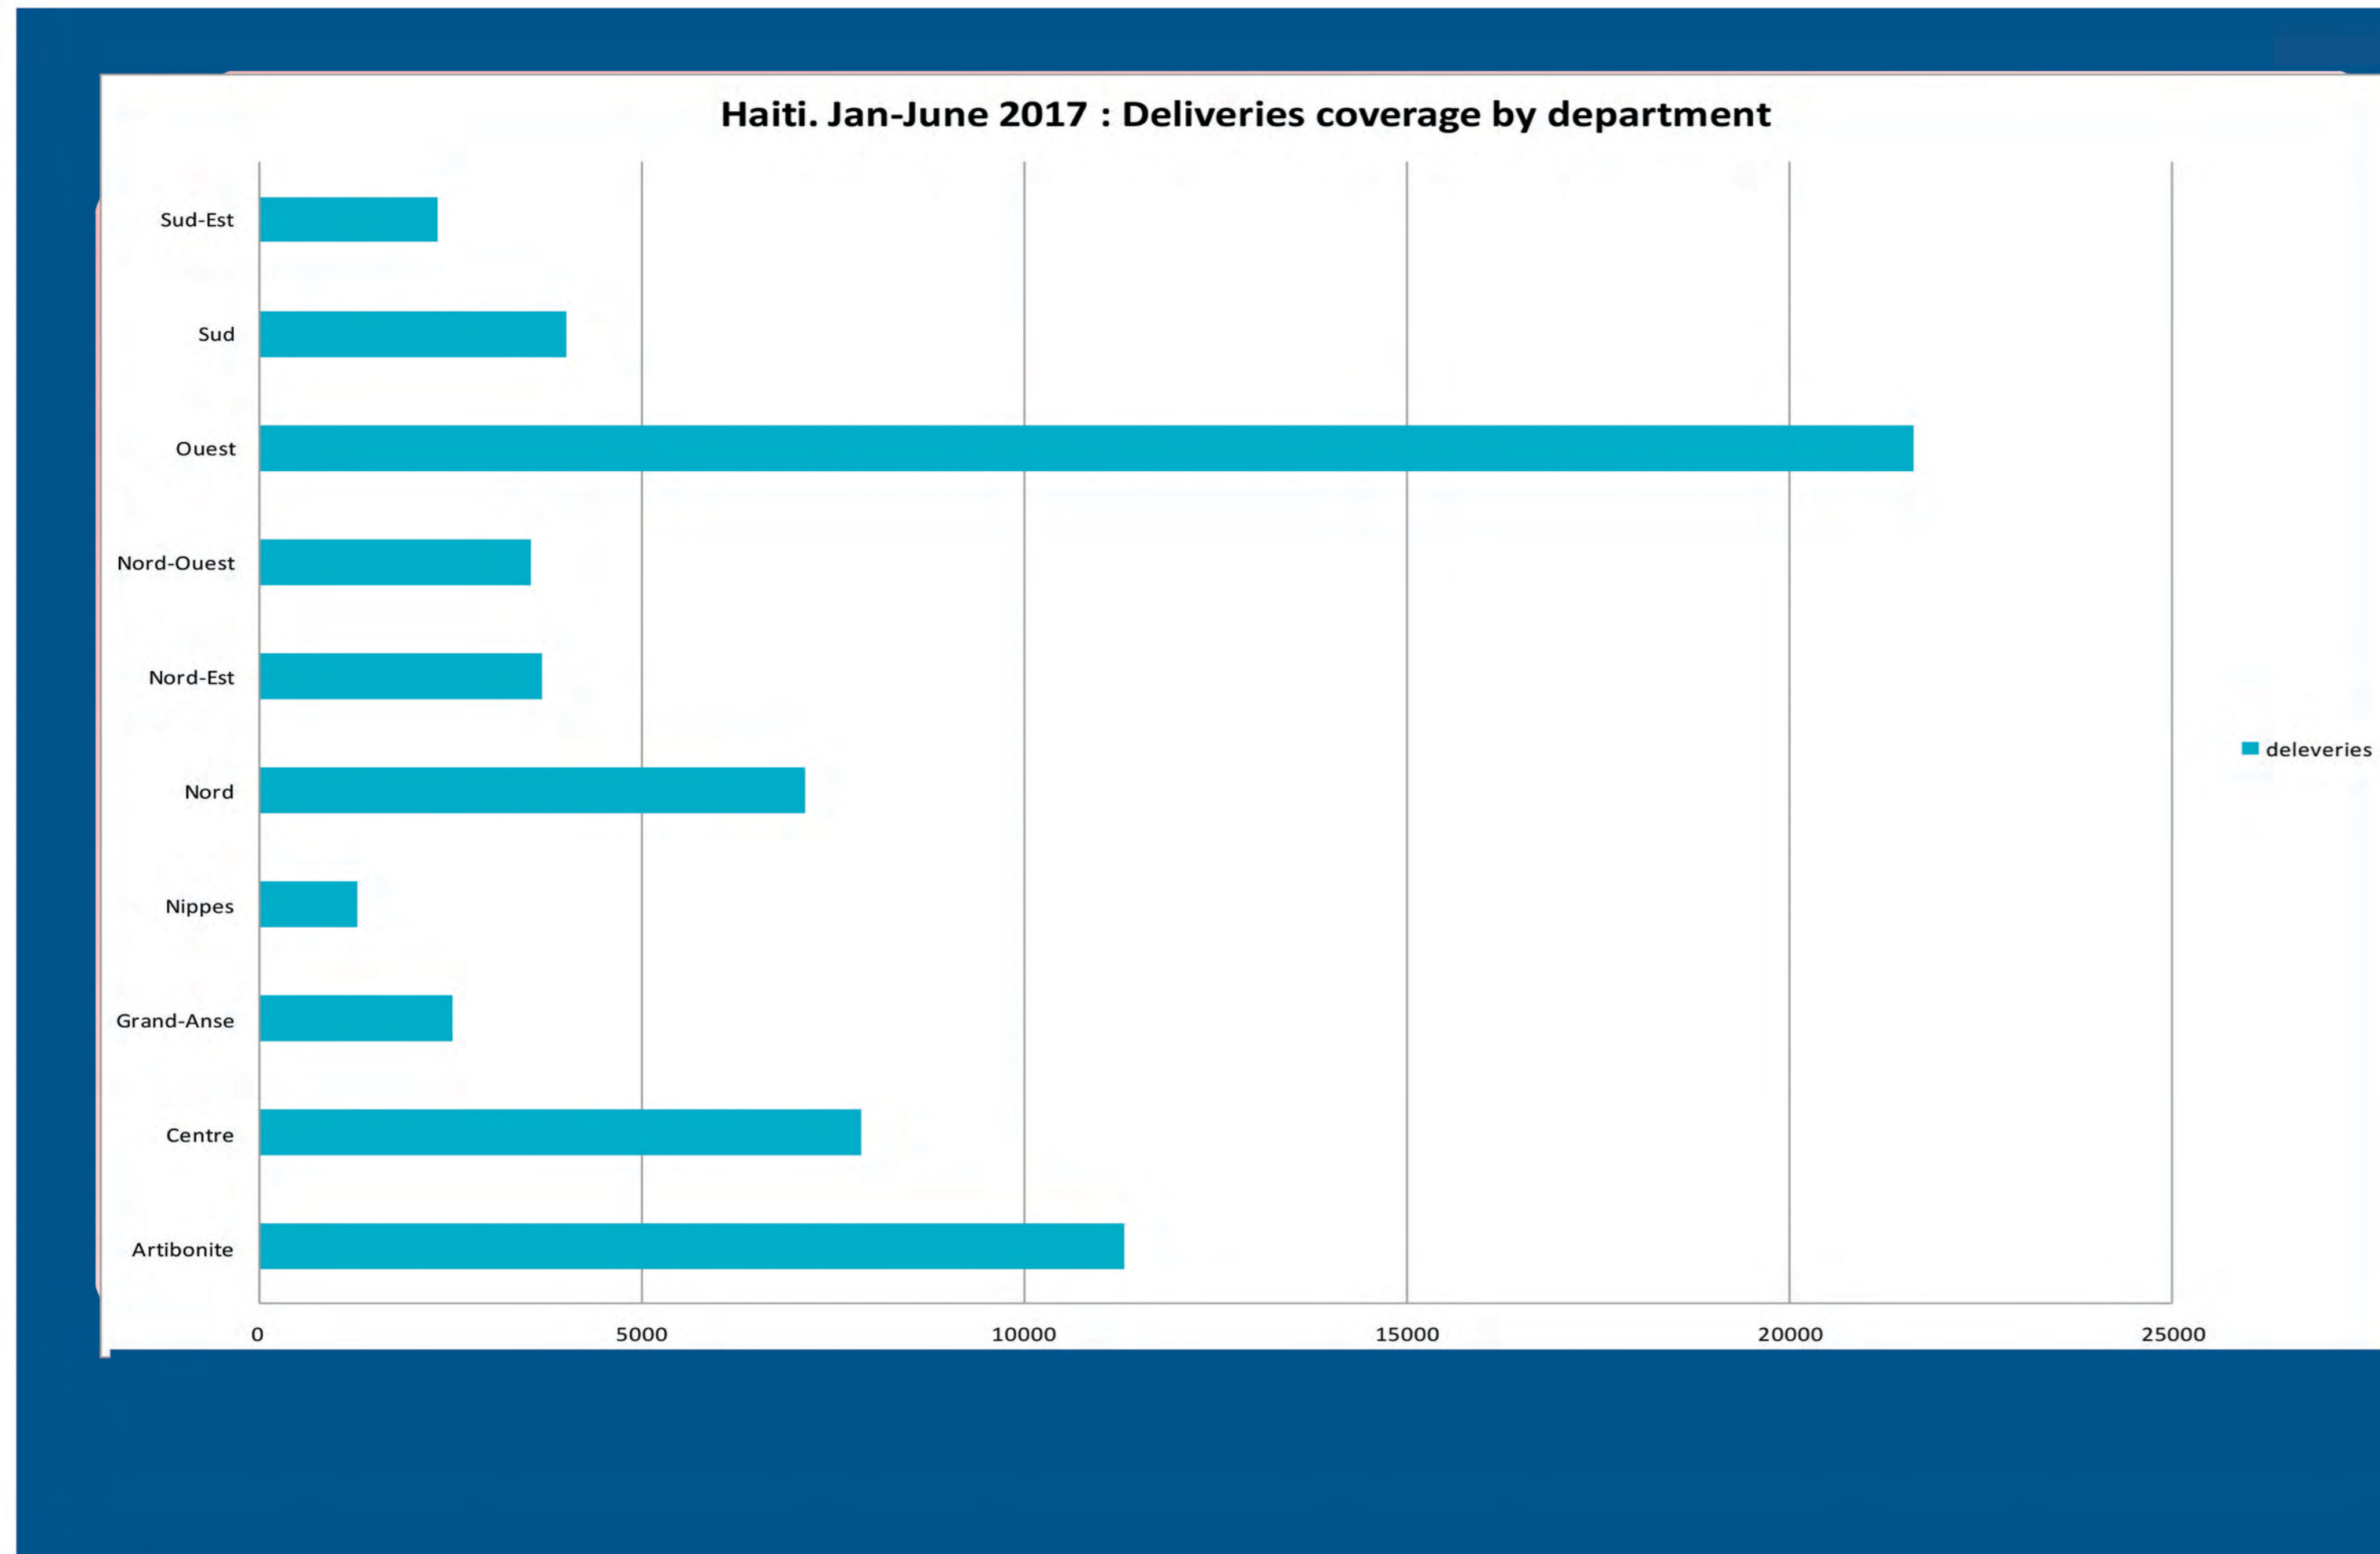

Reporting rates for MOH sites: Jan-June

### Challenges

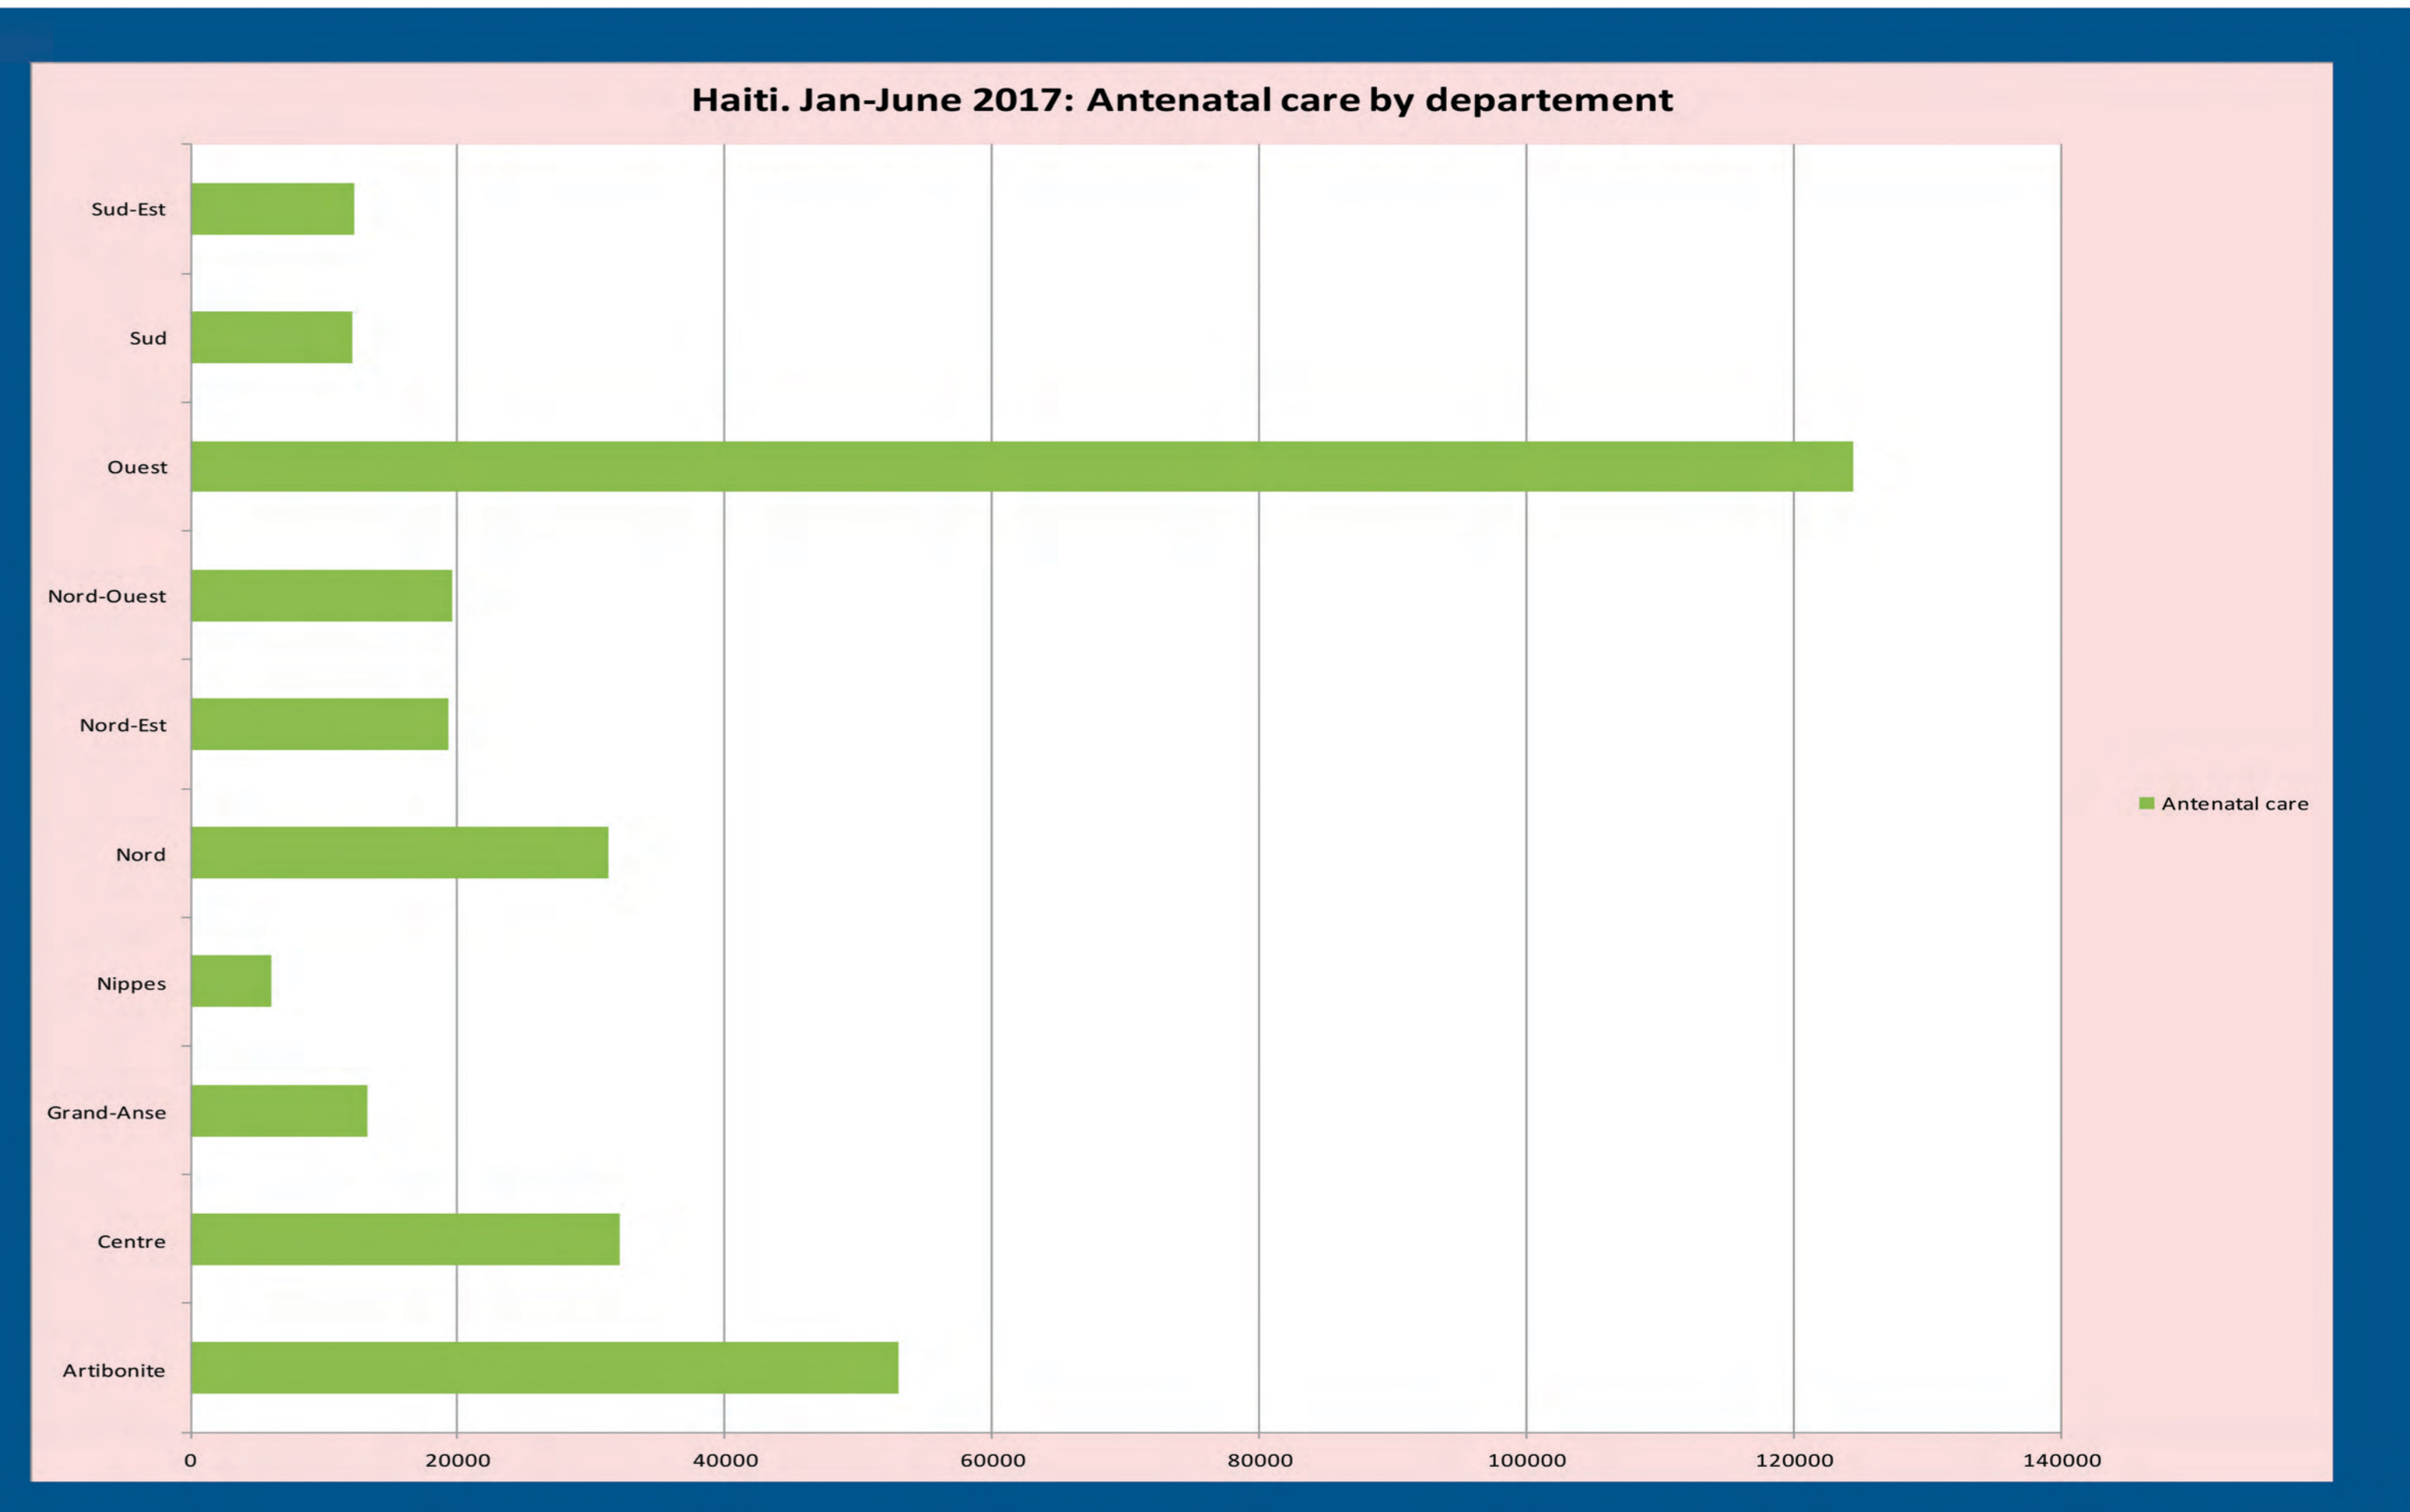

- Data quality still an issue .
- Implementation and deployment took a very long time
- Consensus for indicators from several partners still an issue.
- GOH still lacks internal to support SISNU (DHIS2) implementation
- Internet connection still lacking

### Successes

- Improve reporting rate
- Improve data quality
- MOH can take decision base on quality data .
- Unique dashboard containing key indicators across several programs
- Roll out to all MOH health centers (1000 + sites)

Reporting deliveries from MOH sites

Reporting antenatal care from MOOH
